

The Illustrated Guide to a Ph.D.

Matt Might

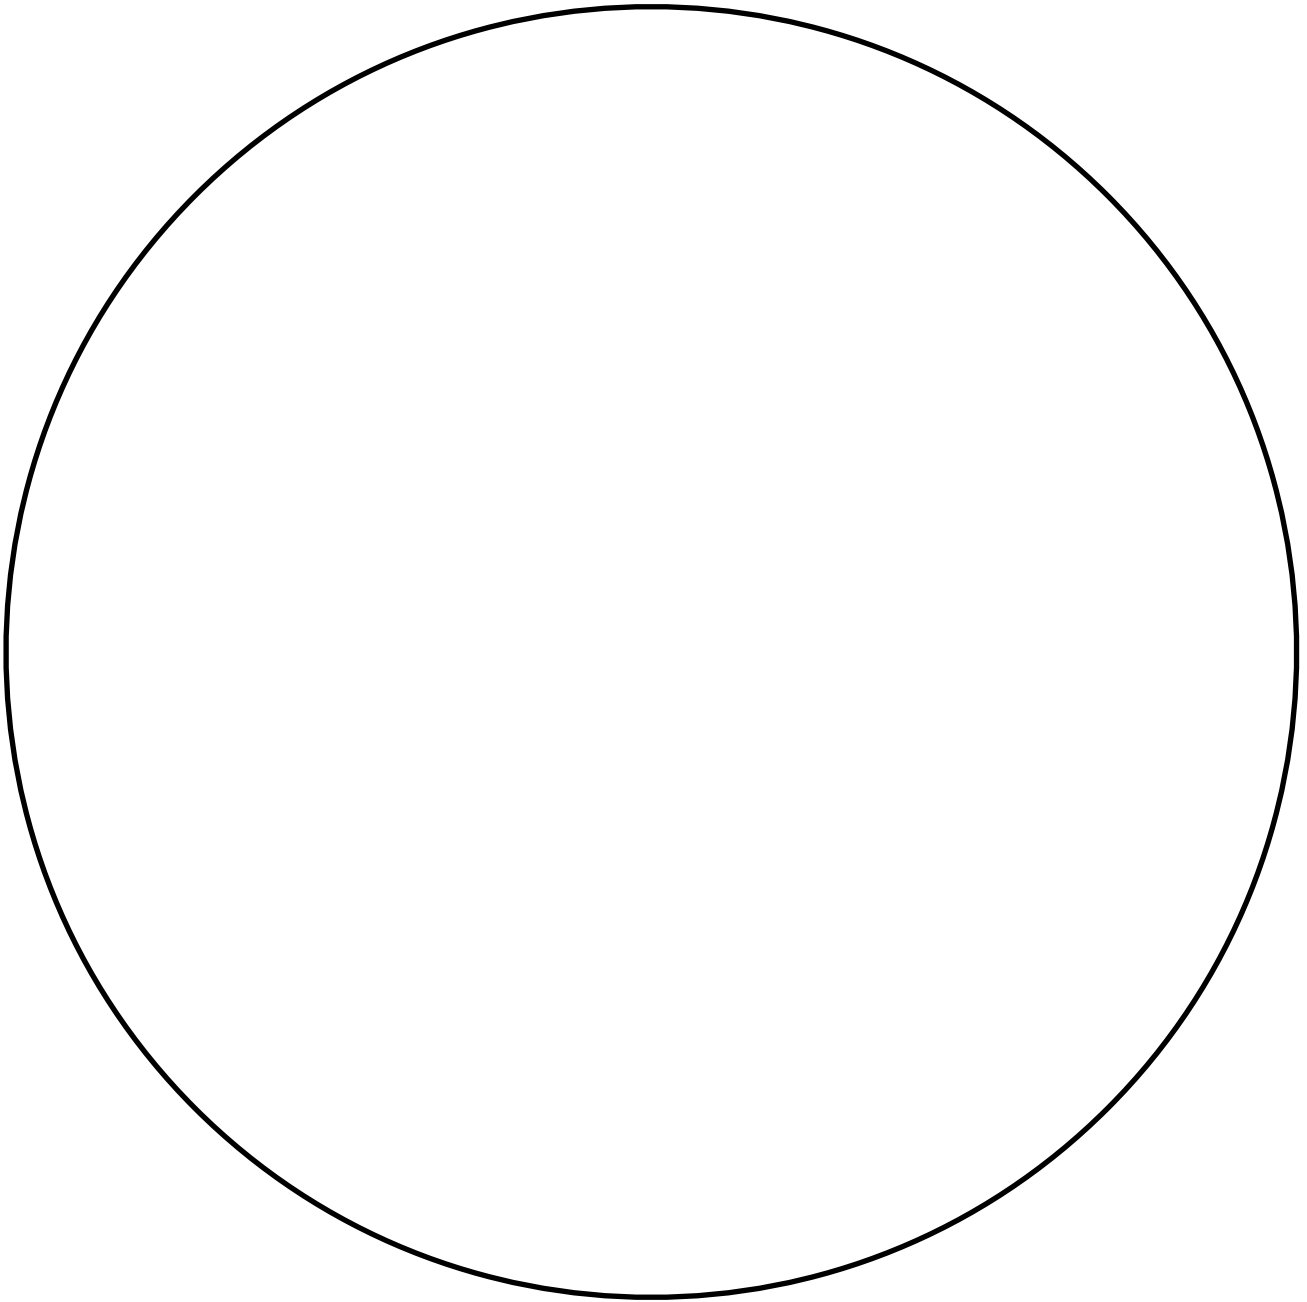

Foreword

Every fall, I explain what a Ph.D. is.

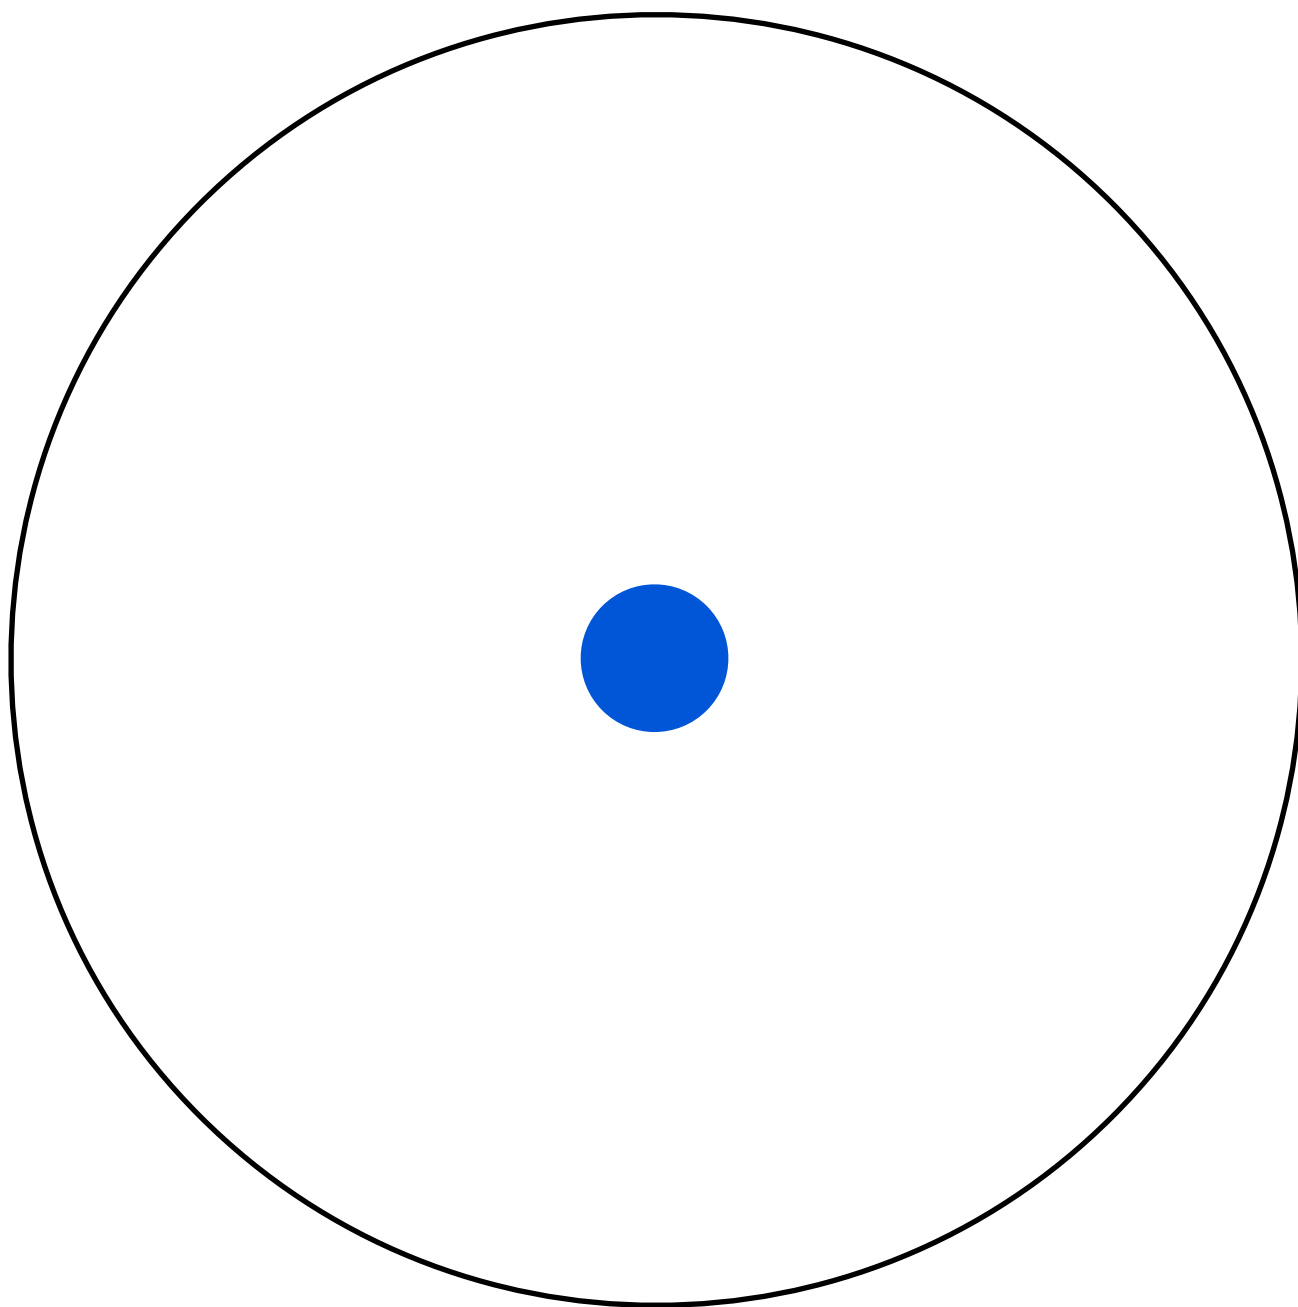

It's hard to describe it in words.

So, I use these pictures.

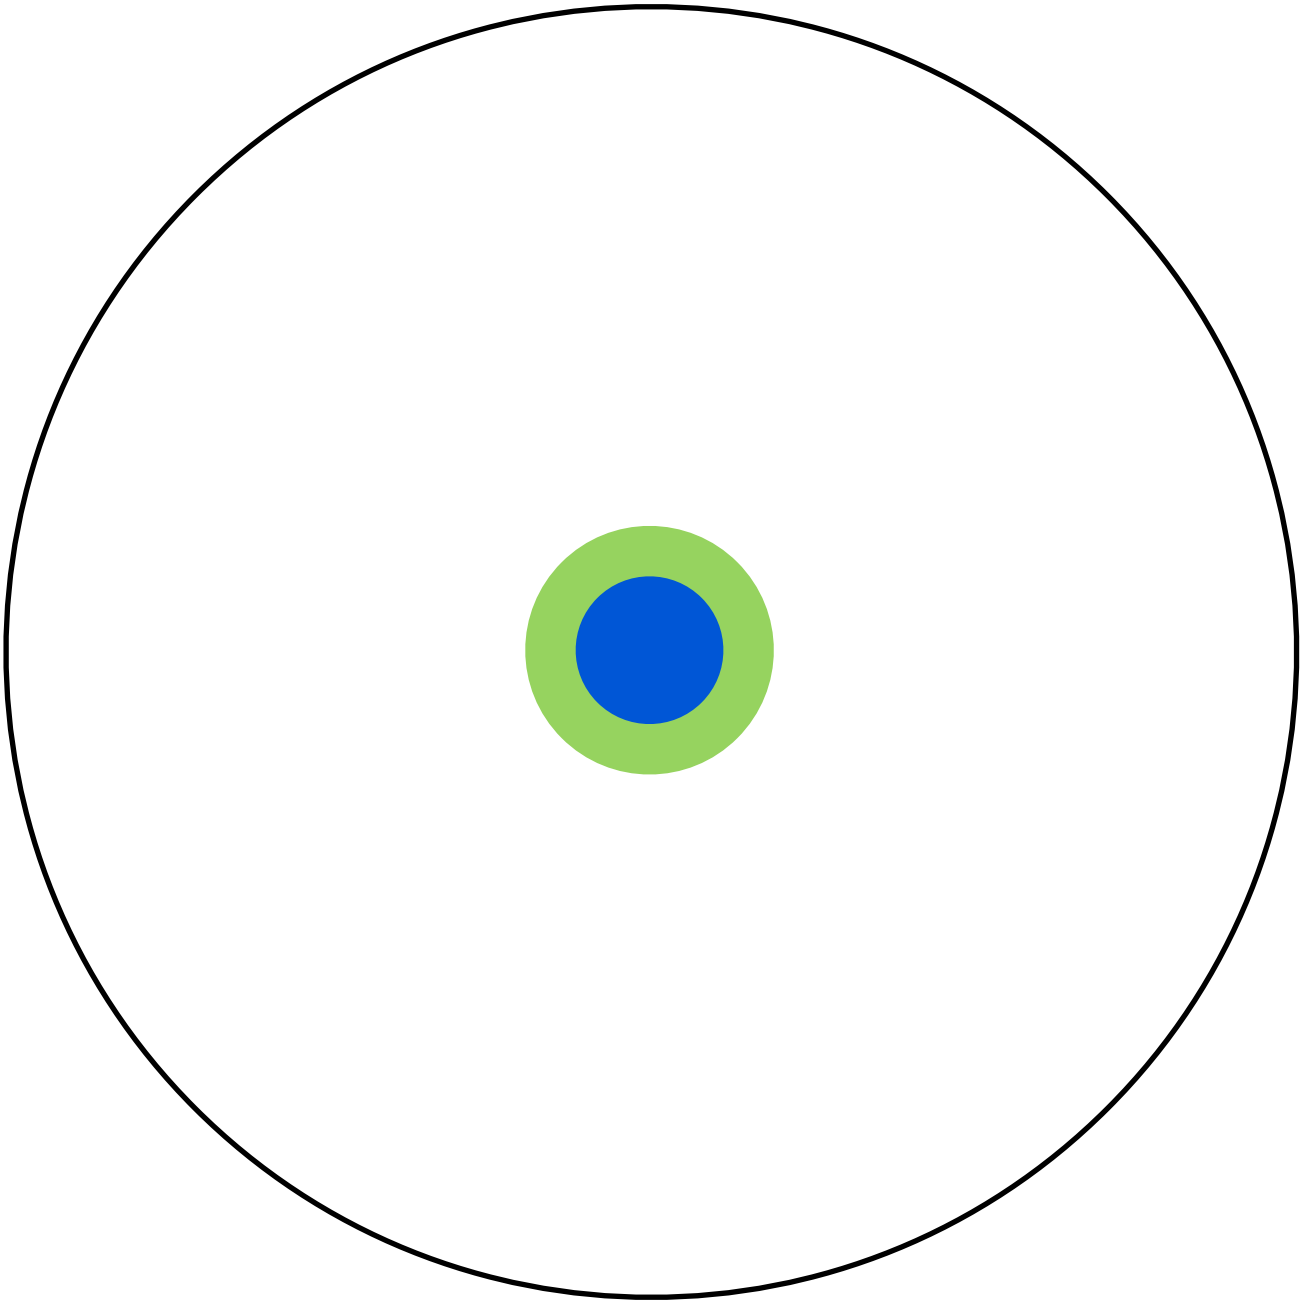

Imagine a circle that contains all of human knowledge.

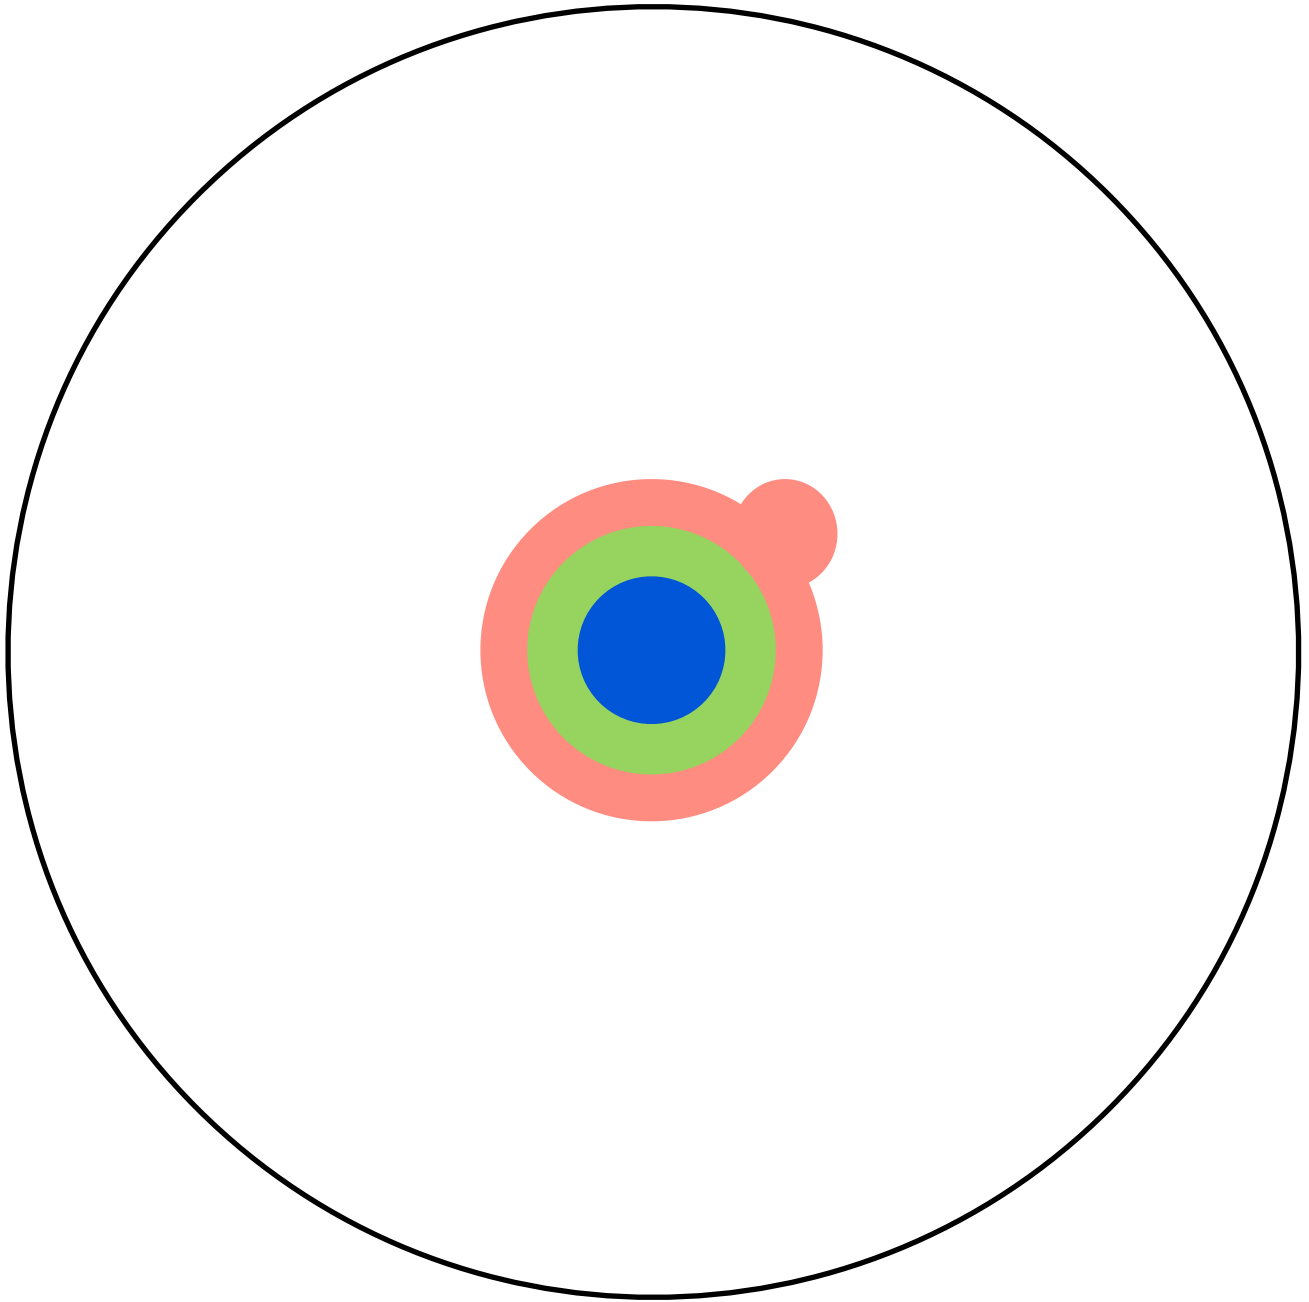

By the time you finish elementary school, you know a little.

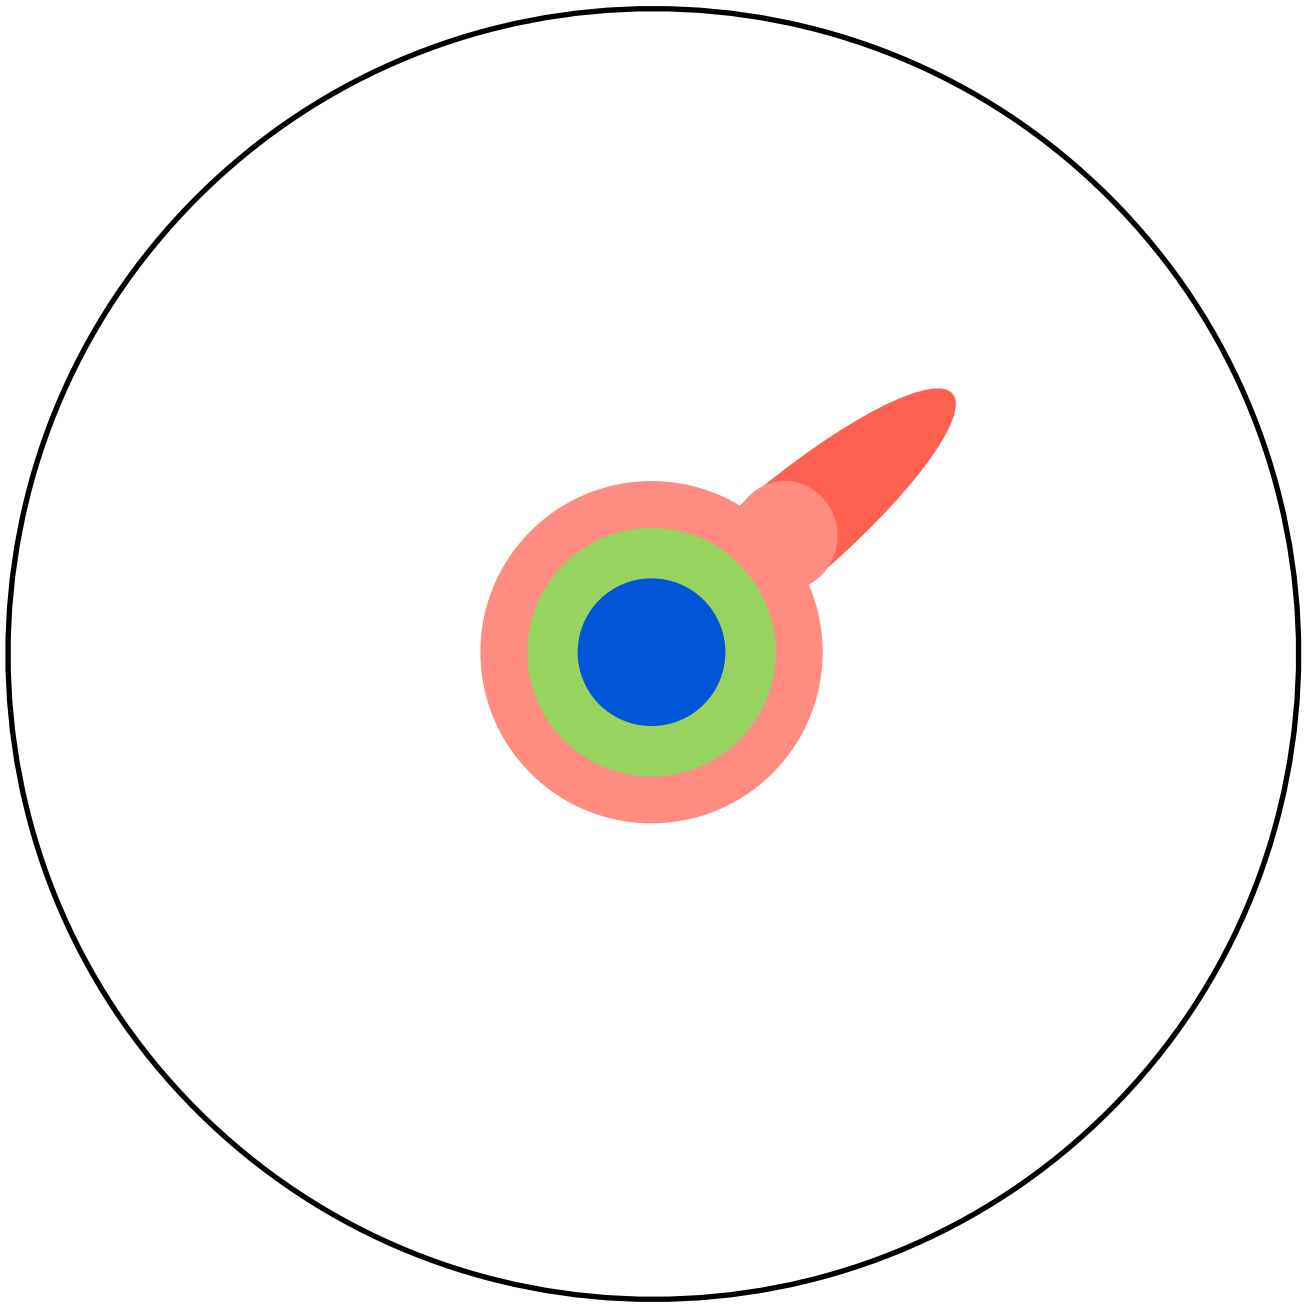

By the time you finish high school, you know a bit more.

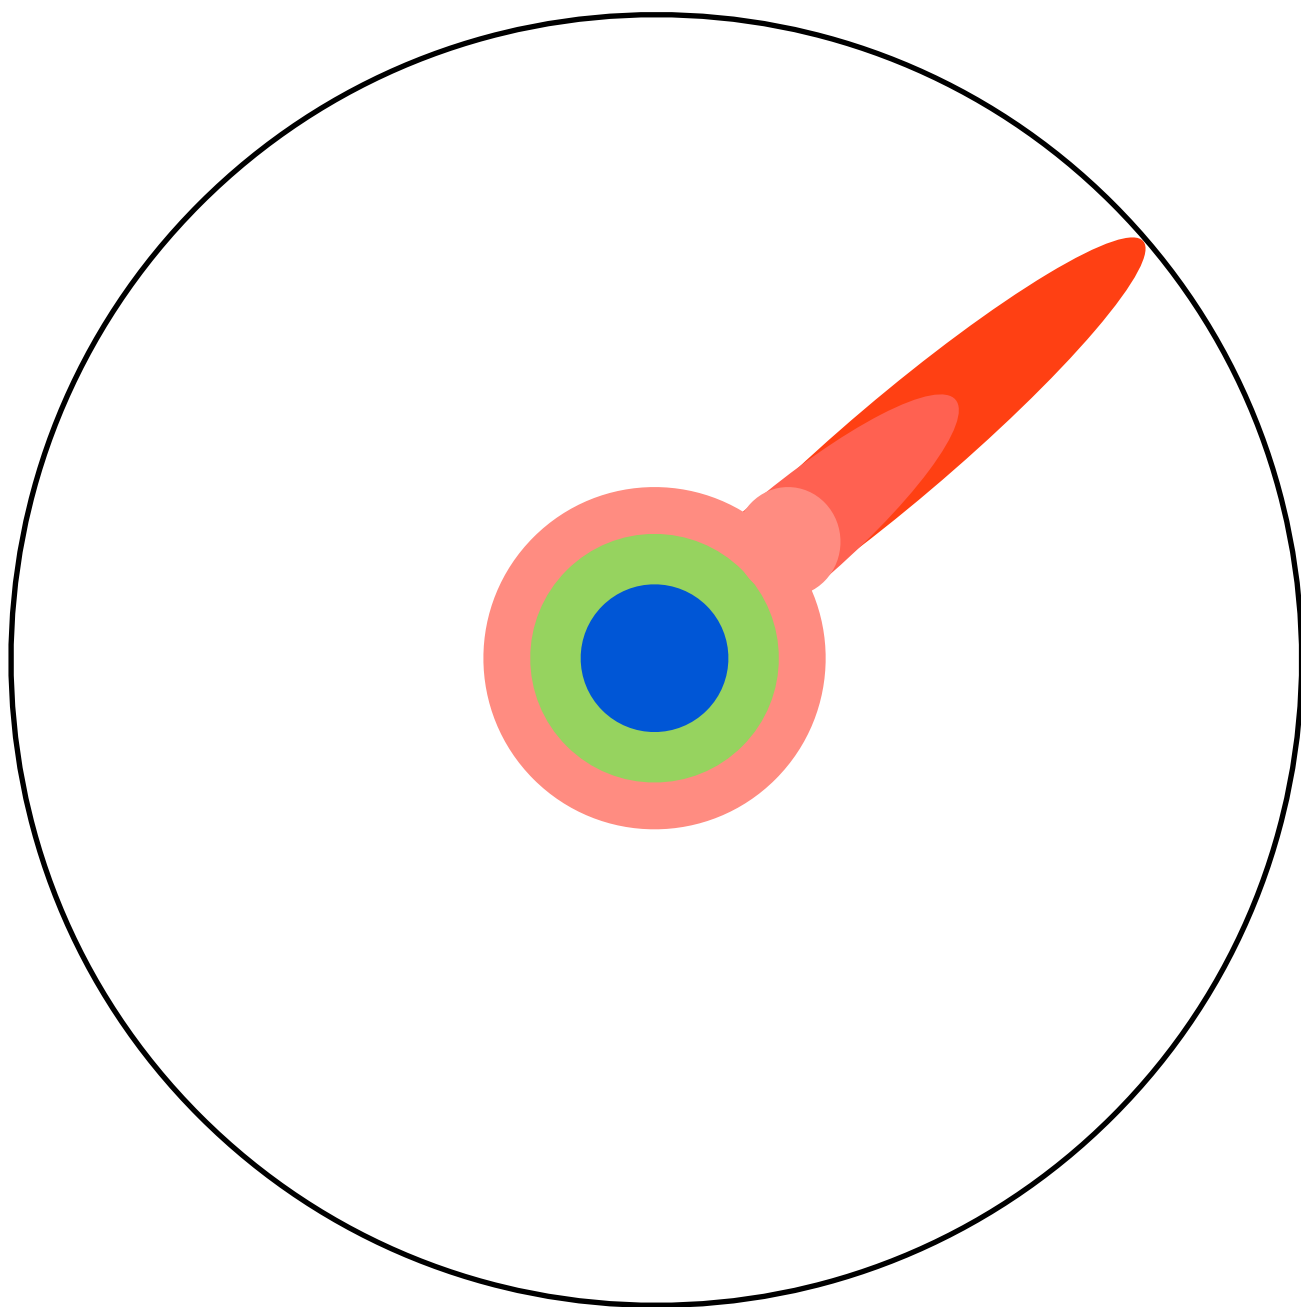

With a bachelor's degree, you gain a specialty.

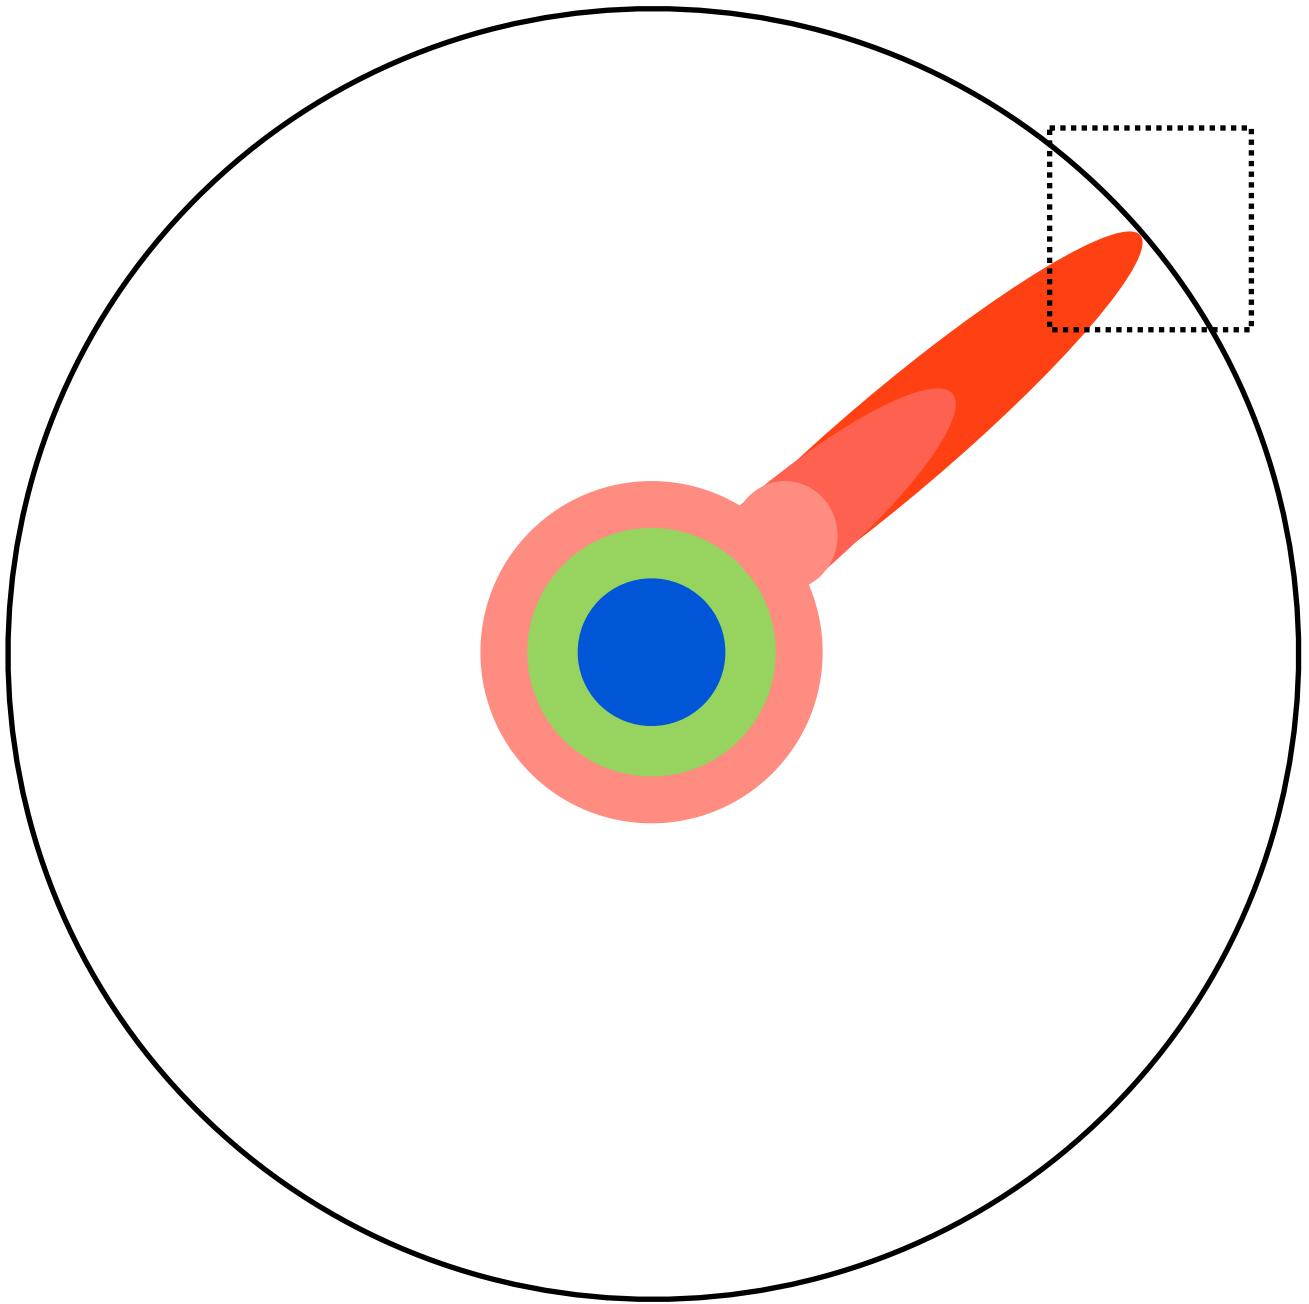

A master's degree deepens that specialty.

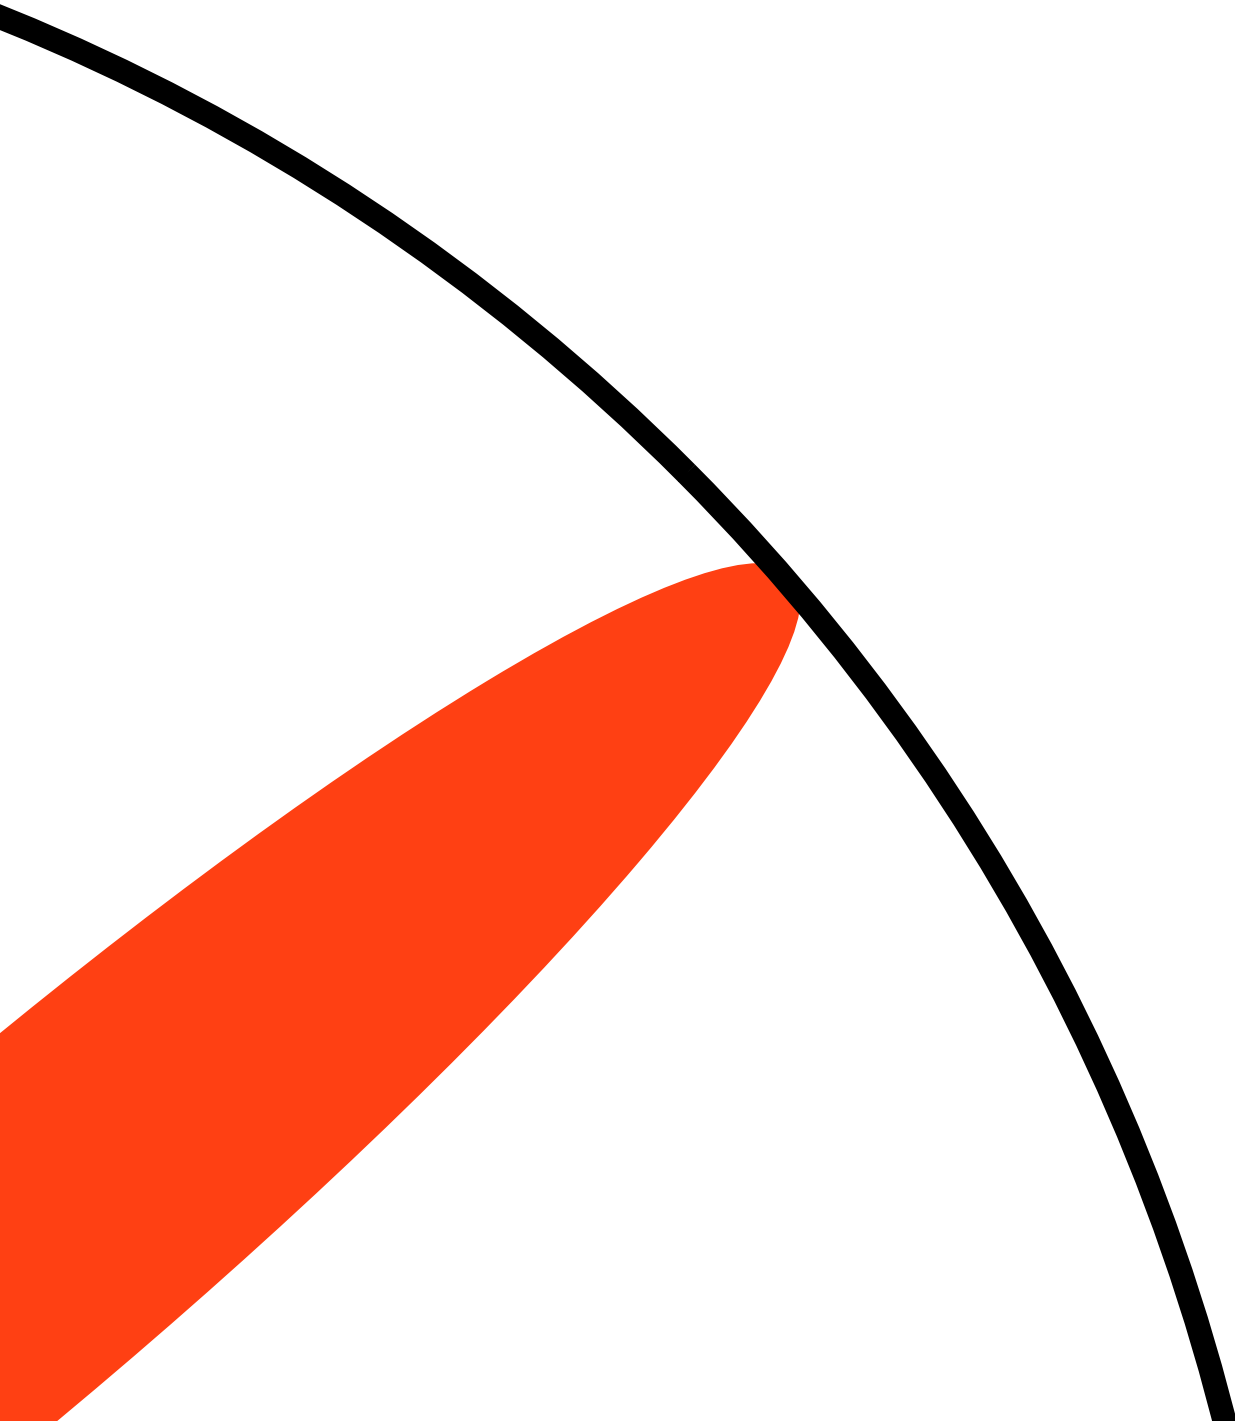

Reading papers takes you to the edge of human knowledge.

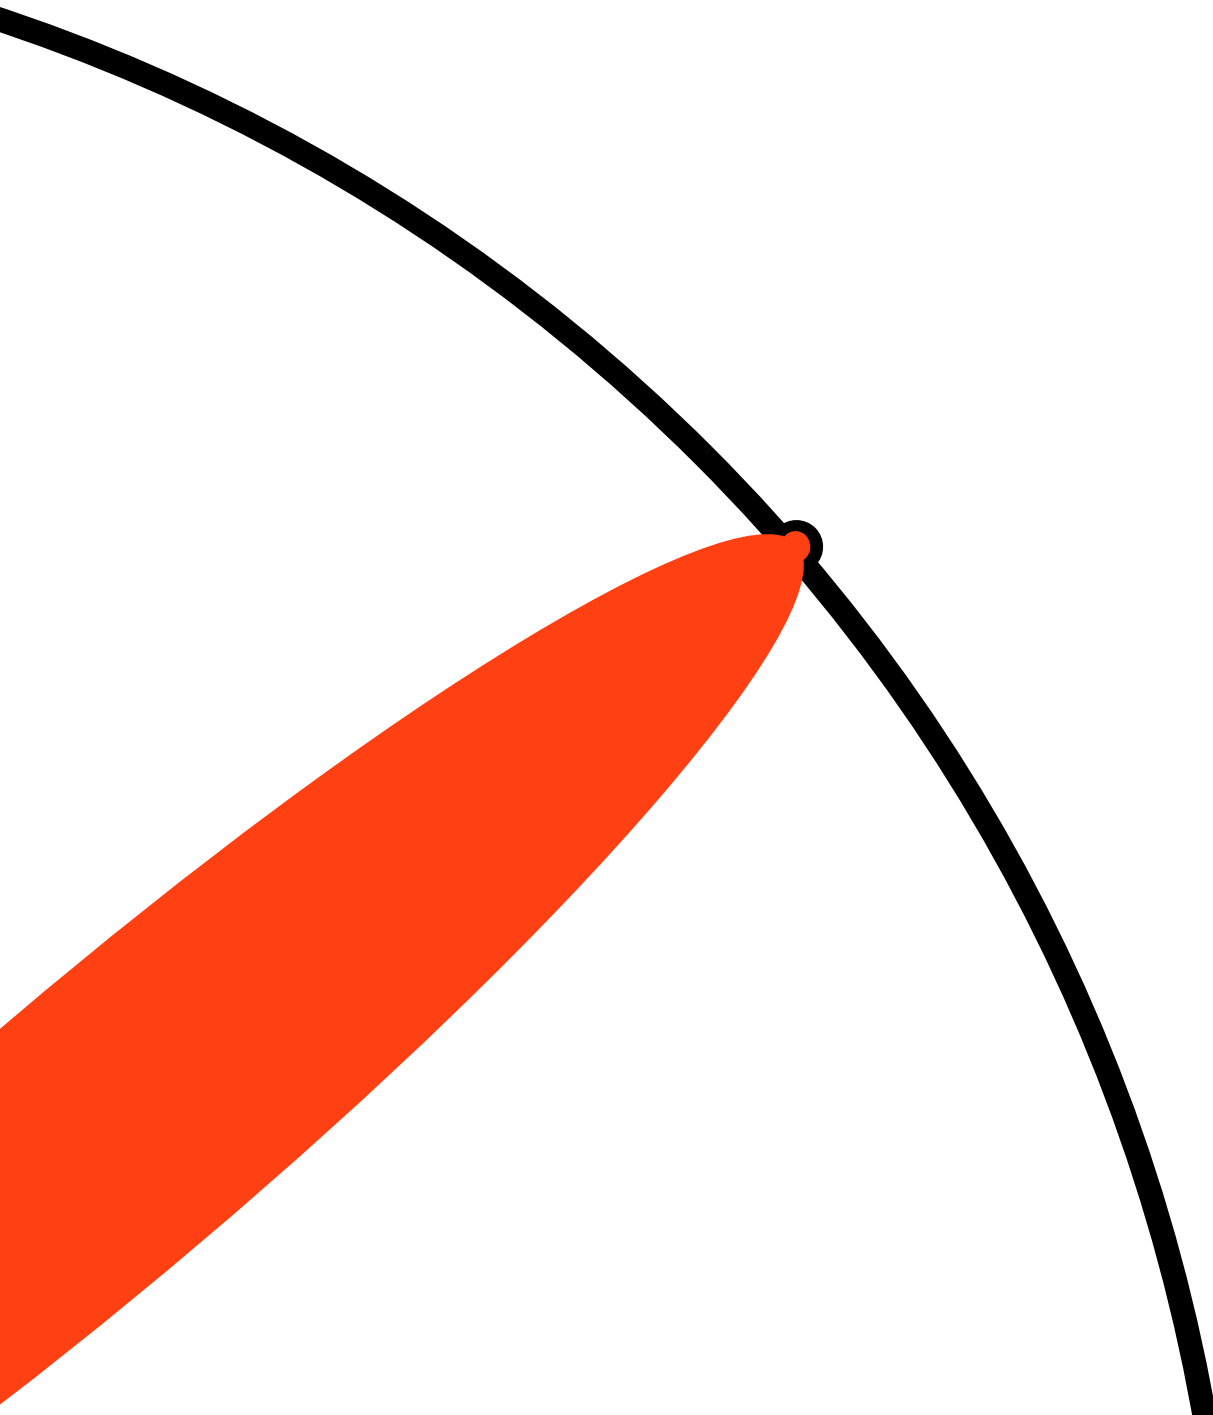

Once you're at the boundary, you focus.

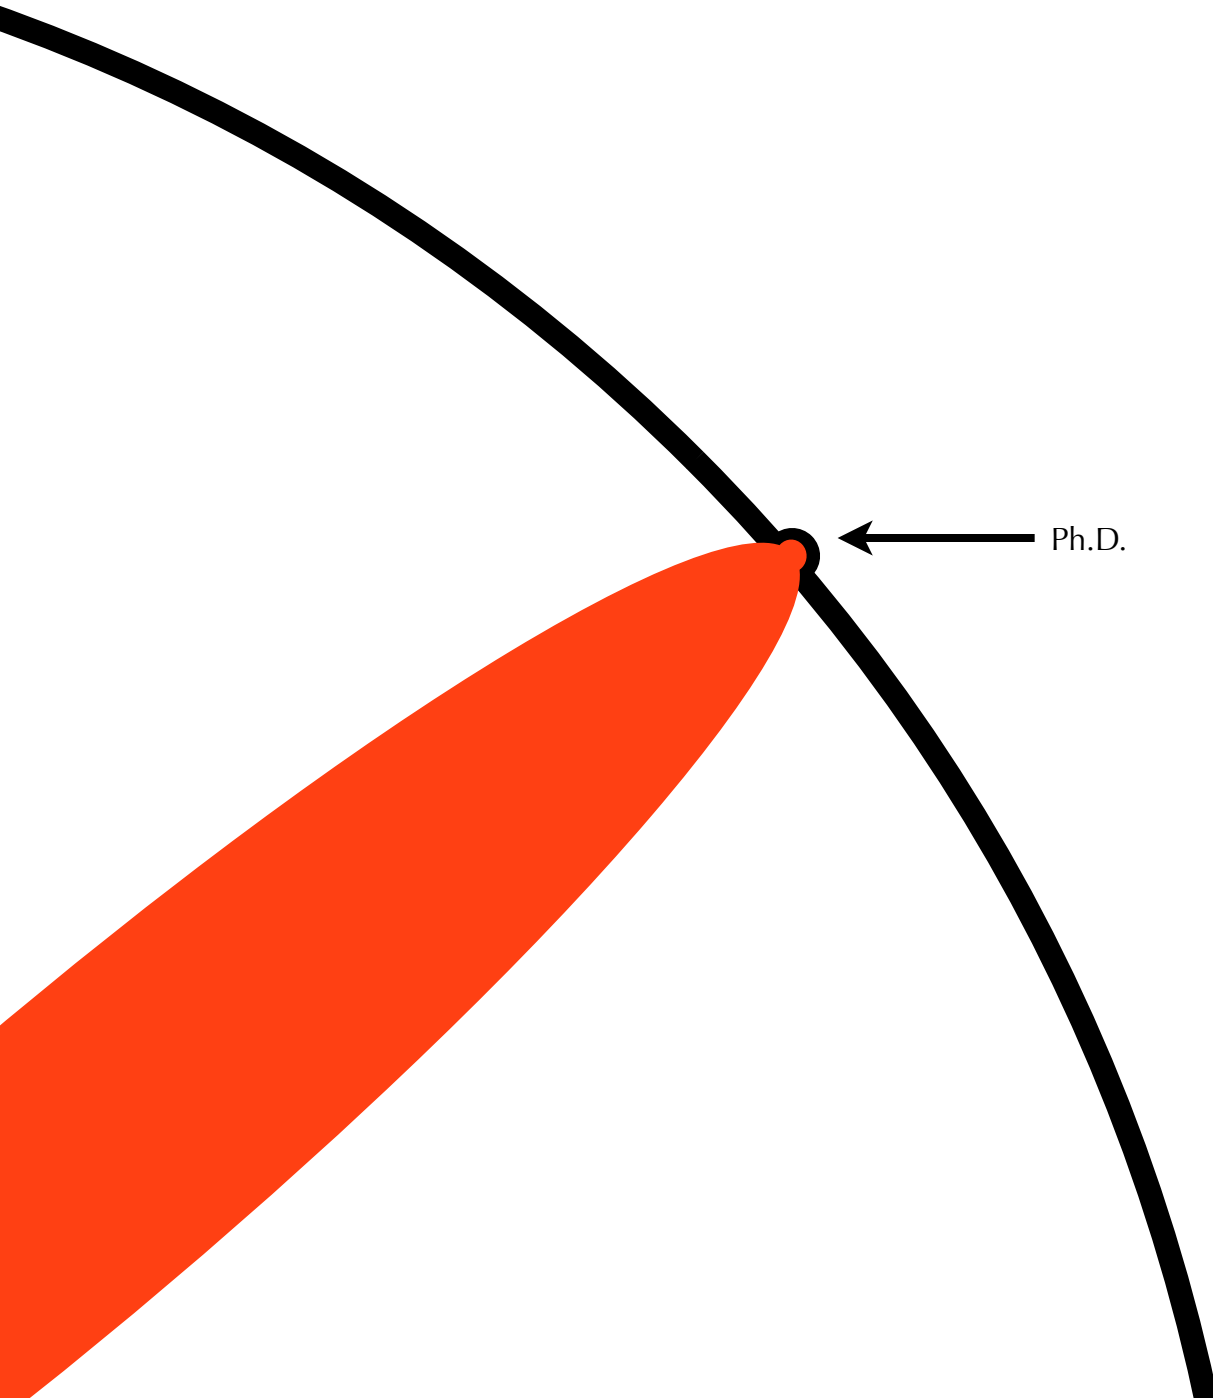

You push at the boundary for a few years.

Until one day, the boundary gives way.

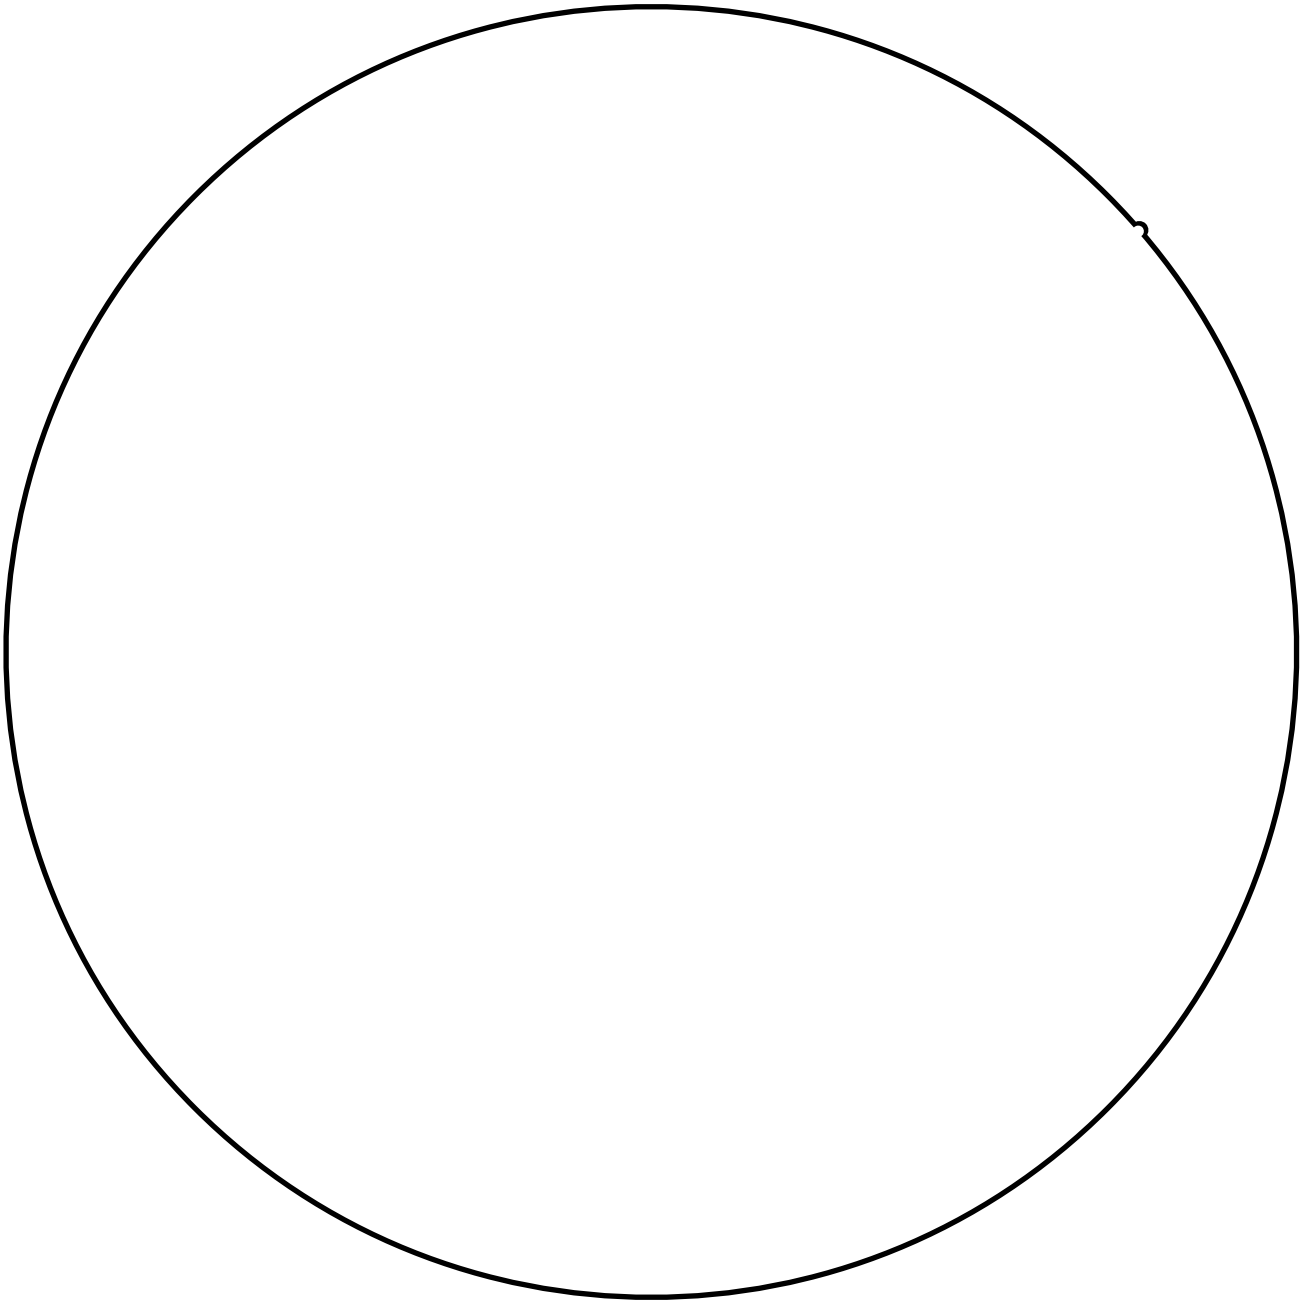

And, that dent you've made is called a Ph.D.

Of course, the world looks different to you now.

So, don't forget the bigger picture.

Keep pushing.
